

iCloud

Google Drive

Leiðbeiningar um hvernig
aftengja má myndir í iCloud
og tengja við Google Drive.

Fara í Settings og velja iCloud

Velja off í Photos

Af-velja iCloud Photo Library.
Þú ræððu hvort þú hefur kveikt á My Photo Stream. Það hefur ekki áhrif á plássið í iCloud.

Velja Drive appið og leyfa aðgang að myndum

Ef þú ert með Google Photos appið þá leyfa einnig aðgang.

Nú er hægt að skoða myndirnar í Google Drive með því að smella á Google Photos.

Nú á allt að vera klárt..... en
ef myndirnar í iPadinum
"syncast" ekki við Drive þá.....

Þá má prófa að slökkva og kveikja á Auto Backup í sjálfu Drive appinu.

Turn Auto Backup on (or off) using an iPhone or iPad

1. Open the Google Drive app .
2. Touch Menu .
3. Touch **Settings** > **Photos**.
4. Touch **Auto Backup**.
5. Next to "Auto Backup," turn it **On** or **Off**.

Og/eđa í Google Photos appinu.

iOS app

Change the setting

1. Open the Google Photos app .
2. At the top left, touch Menu .
3. Select **Settings**.
4. Touch **Back up & sync**.
5. Switch on or off.

Turning it on

If you see a message asking to allow the app to access your photos:

1. Open the iOS settings app > touch **Privacy > Photos**.
2. Switch **Google Photos** on.

Turning it off

Note that if you turned back up & sync on in other apps, like Google Drive, you need to switch it off in every app. For example, if you turned back up & sync on in both the Google Photos and the Google Drive apps, you'll need to turn it off in both apps to fully turn off back up & sync.

Optional: Check what's backed up

1. At the top left of the Google Photos app, touch Menu .
2. Select **Photos**.
3. Photos and videos that **are not** backed up will have this icon .
